aamirayub8081@gmail.com

Open to on-site & remote roles

Results-oriented Python Backend Developer with hands-on experience building scalable, production-ready backend systems and RESTful APIs using FastAPI, Django, and Flask. Skilled in designing structured PostgreSQL data models, implementing robust data validation, and integrating frontend and backend layers into full-stack applications. Comfortable working in collaborative, version-controlled team environments and eager to contribute reliable, well-engineered solutions within modern software development teams.

TECHNICAL SKILLS

Languages: Python

Frameworks: Django, FastAPI, Flask

Frontend: React

Databases: PostgreSQL

Concepts: REST APIs, JSON, Data Validation

TOOLS & TECHNOLOGIES

Docker

Git

PostgreSQL

Selenium

Web Scraping

Microsoft Excel

Google Sheets

REST APIs

PROFESSIONAL EXPERIENCE

Python Data Scraper / Data Researcher · Remote

Jul 2025 – Present

Baraqi (Canada)

- Developed and maintained 500+ Python web scrapers to extract structured staff directory data from California city and county government websites.
- Used Requests, BeautifulSoup, Selenium, and Playwright to handle static, JavaScript-rendered, and protected websites across CivicPlus, WordPress, Drupal, and Vision/Granicus platforms.
- Integrated scraper data with Django and PostgreSQL, using Django ORM to validate and verify scraped data before deployment.
- Collaborated via Git and GitHub through pull requests, code reviews, and merge conflict resolution, with Docker-based development and production deployments.

Python Developer

2023 – 2024

iPlex

- Built and maintained backend services and APIs using Python.
- Worked with databases and integrated third-party services.

Python Developer

2022 – 2023

Adam Software House

- Developed and integrated RESTful APIs to connect frontend and backend layers, applying structured data validation for reliable, consistent data flow.
- Built backend features in Python within a collaborative development team, contributing to scalable application design, database management, and code quality.

PROJECTS

Job Aggregator API

Python · FastAPI · PostgreSQL · SQLAlchemy · Docker

github.com/ayubaamir/Job-aggregator-api

- Built a FastAPI backend that aggregates live remote job listings from the RemoteOK API and stores them in PostgreSQL with duplicate detection.
- Served listings through REST endpoints for listing, searching, and on-demand refresh.
- Fully containerized with Docker and docker-compose.

Hospital Management System

Python · Django · FastAPI · PostgreSQL

- Engineered a FastAPI backend to manage hospital operations, with CRUD endpoints for patient records.
- Modeled and managed structured patient data in PostgreSQL for efficient clinician access.

EDUCATION

Master of Computer Science (MCS)

University of Science & Technology (UST), Bannu —
KPK, Pakistan

CERTIFICATIONS

Diploma in Information Technology (DIT)

Khyber Pakhtunkhwa Trade Testing Board · 2020

LANGUAGES

English — Professional working proficiency
